

## The problem

People often forget about things they lend and borrow.

## The solution

iLend lets you easily keep track of all the things you lend and borrow. Our app addresses two problems: the person who lent something doesn't have to constantly ask to get it back and the person who borrowed it can easily remember it.

## Smart connection

Connect an item to a friend via Facebook so you both see it in the app and remember it!

## People behind iLend

We are a two-person student team from Poland. Our mission is always about making life easier. We are the creators of PluginMate - tools to help designers be more productive, and now we are making an app that can hopefully help everyone!
